

Drum Beats 6/8

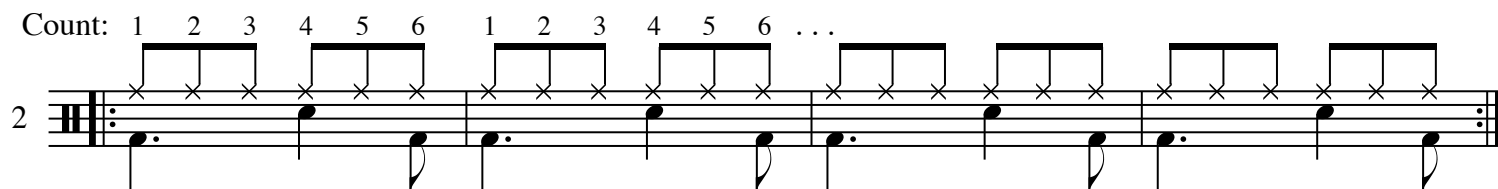

6/8 time can take a little time to get comfortable with. There are now six beats per measure, and the beat note is the eighth note. This is quite a bit different than 4/4 time, in which there are four beats per measure and the beat note is the quarter note.

Count each eighth note as its own whole number. In 6/8 time we would use the "&s" when counting out the sixteenth notes.

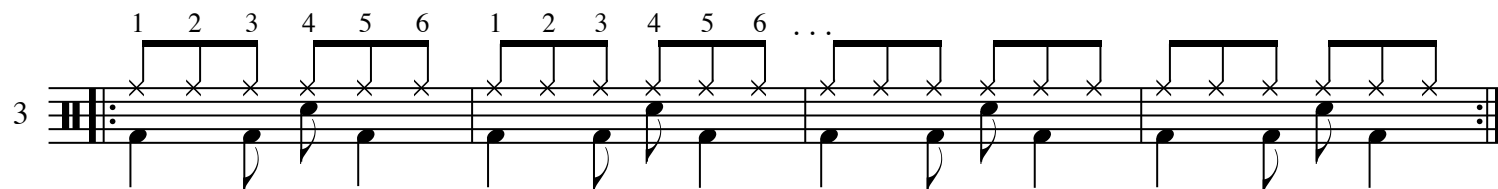

Count: 1 2 3 4 5 6 1 2 3 4 5 6 ...
